

A Science Study

Our Solar System

What Does This Module Include?

“Our Solar System” is a nine-week study on astronomy that allows kids to discover our home Solar System and beyond! The module includes schedule pages for each of the nine weeks that schedule daily assignments, help you understand how to use each resource, and include website links. As this is a science study, it is scheduled for two days per week.

The module also includes interactive journaling pages that allow your student to try out and practice what they are discovering about planets, stars, comets, and more. The pages allow kids to show what they’ve learned in fun ways, and lets them try

astronomy skills with sites online. They are easy to complete and use.

This module is 110 pages in length and is designed to be used in 9 weeks.
